DATA TRANSFER SSM2.0

Among the equipment related to SSM 2.0, PIUSI has developed a set of solutions able to connect the electronic/mechanical devices to the fluid control system, which is the software that organizes the operation of the hardware; in this case Self Service Management 2.0. How does data transfer with SSM2.0 work? It depends on the technology required.

Direct downloading

Use your Manager Key to transfer the data from dispenser to PC: it is enough to touch the dispenser with the key and then use the key reader to transfer the data collected.

LAN/Wi-Fi

The way to receive in real time all information regarding the transactions: using PW LAN or PW WiFi the software recognizes the fuel dispensers that will automatically send the information to the data to the Self Service Management 2.0 software.

Mobile Network

The brand new PW MOBILE 4G 2.0 allows users to install the dispenser wherever desired, even in the most remote areas, without the need of a local network: the device uses the mobile 4G (or 3G) technology to communicate and transfer data and comes with a SIM card included.

WINDSCREEN

PW MOBILE

A new communication system that allows you to transfer data using mobile 4G network.

4G/5G SIM card not provided by PIUSI

KEY READER AND MANAGER KEY 2.0

LAN

A network card that allows the RS485 signal to be converted for connection to a LAN, through a simple and intuitive interface.

PW WI-FI

A Wi-Fi network card that allows the RS485 signal to be converted for connection to an existing Wi-Fi network.

TECHNICAL DATA

PART #	DESCRIPTION
F1226201A	KEY READER
F20552000	GREY MANAGER KEY FOR 1.5/2.0
F1271012A	PW-WIFI UPGRADE FOR 2.0 DEVICE
F12710150	PW-MODEM 4G FOR 2.0 DEVICE
F1271009A	PW-STATION WIFI
